ABOUT ME

Software Engineer with proven hands-on experience in architecting scalable enterprise applications and high-performance systems. Proficient across the full stack with C#, .NET 8, ASP.NET Core, React, and Azure, alongside specialized expertise in Windows systems engineering (C, Kernel Mini-Filter Drivers, IOCTL). Proven track record of delivering resilient microservices, secure RESTful APIs, and modern UIs using Clean Architecture.

TECHNICAL SKILLS

- **Languages:** C#, C, TypeScript, JavaScript, SQL
- **Backend:** .NET 8 / .NET Core, ASP.NET Core Web API, Entity Framework Core, LINQ, RESTful Microservices
- **Frontend:** React 19, TypeScript, HTML5, CSS3/SCSS, Bootstrap
- **Cloud & DevOps:** Microsoft Azure (App Services, Functions, Blob Storage, Key Vault, VMs), Azure DevOps, CI/CD, Git, GitHub
- **Databases:** SQL Server, PostgreSQL, MongoDB, Stored Procedures, Indexing & Query Optimization
- **Systems & Security:** Windows Kernel Drivers (Mini-Filter), IOCTL Communication, Windows Services, User-Kernel Communication, Memory Dumps & BSOD Debugging, File System Filtering (DLP)
- **Architecture & Practices:** Clean Architecture, SOLID Principles, Design Patterns, Unit Testing, Agile/Scrum
- **AI & Integrations:** Generative AI / LLM Integration (OpenAI / Azure OpenAI APIs), Semantic Kernel

PROFESSIONAL EXPERIENCE

KnackForge Soft Solutions

Chennai, India

Senior Software Engineer

Dec 2025 – Mar 2026

- Built and maintained microservices using C#, .NET 8, and Clean Architecture following SOLID principles.
- Developed and deployed Azure Function Apps and REST APIs to handle background data processing.

Intechhub Solutions

Chennai, India

Software Engineer

Dec 2023 – Oct 2025

- Developed low-level security and monitoring products using C, C#, and Windows Kernel drivers.
- Built a Windows Mini-Filter driver to monitor file activity and block unauthorized file transfers (USB, network).
- Led a small development team, assigned daily tasks, and fixed critical system crashes (BSOD).
- Handled backend development using C# .NET and REST APIs for client-server communication.

KEY PROJECTS

Case Tracker Application

Tech Stack: C#, .NET 10, ASP.NET Core Web API, Maui, PostgreSQL Server, Entity Framework Core

- Planned and architected the application from scratch, designing database ER diagrams, API structures, and workflow requirements before starting development.
- Created clear technical documentation, API specifications, and setup guides to help multiple team members onboard and write code easily.
- Set up CI/CD pipelines using GitHub Actions / Azure DevOps to automatically build, test, and deploy code updates from team members.
- Led daily task planning, conducted code reviews, and guided contributors to maintain consistent coding standards.

Data Loss Prevention (DLP) System

Tech Stack: C, C#, Windows Mini-Filter Driver, IOCTL, Windows Services, React, MongoDB

- Developed a Windows Mini-Filter driver in C to track and block unauthorized file transfers (USB, Bluetooth, network).
- Designed an IOCTL interface to send alerts and file events from kernel mode to user services.
- Fixed driver stability issues and kernel crashes (BSOD) using WinDbg.
- Built a React dashboard for administrators to view activity logs and manage security policies.

Employee Activity Monitoring Agent

Tech Stack: C#, React16, .NET Windows Services & .NET Core 6 Web API, REST APIs, MongoDB

- Created lightweight Windows background services to track system metrics with minimal CPU and memory usage.
- Built secure REST APIs to send encrypted activity logs from client systems to the central database.
- Packaged the application using MSI installers for easy installation across enterprise machines.

EDUCATION

Master of Computer Applications (MCA) – Online

SRM Institute of Science and Technology (SRMIST), Chennai

Feb 2025 – Present (Expected Completion: 2027)

Bachelor of Arts (BA)

Tamil Nadu Dr. J. Jayalalithaa Music and Fine Arts University (TNJMFAU)

May 2018 – Apr 2021

ADDITIONAL INFORMATION

- **Architecture & Leadership:** Experience in Solution Architecture, ER diagram design, team handling, and mentoring junior developers.
- **Generative AI:** Practical experience with Prompt Engineering, LLM integrations, and building AI-assisted features.
- **Notice Period & Availability:** Immediate Joiner.
